In the **"Application entries"** tab, you will find a list of all reports submitted to the system (regardless of whether you have access to them and can decrypt them or not).

THIS TAB IS ACCESSIBLE TO: THE MAIN REPORT RECIPIENT, THE ADMINISTRATOR, AND THE AUDITOR.

The **Application entries** tab serves as a central place for collecting all reports submitted to the system. It provides a quick overview of the number and status of entries, submission and case closure dates, as well as information about who has access to each case. This enhances transparency, facilitates case management, and allows for efficient monitoring of the procedure – without the need to search through various parts of the system.

Thanks to this tab, you can clearly see:

- how many application entries have been submitted to the system,
- what identifiers (numbers) were assigned to them,
- when they were submitted,
- whether (and when) the procedure was completed,
- and who has access to each entry.

If you have the appropriate permissions (i.e. access to a specific entry), you can open it directly from this tab.

At any time, you can also download a PDF list of all application entries **by clicking the red button**.
